

COMPCAL

Turn your calendar into a mountain your friends can see.

The first calendar-native accountability app that verifies
focus in real time — with friends watching your climb.

Educational & Social Good

React + Vercel + Claude Vision

April 2026

THE PROBLEM

Productivity tools rely on self-report. Self-report is broken.

47%

of college students cite
procrastination as their top
academic problem

74%

say peer accountability beats
self-discipline — yet no app
delivers it

*"I told my study buddy I locked in for 3 hours. I had Instagram open
the whole time. Nothing stopped me."*

— every college student ever

\$13B

productivity app market in
2025, growing to \$30.85B by
2034

800M+

weekly AI users — none verify
actual focus

Why every tool fails

Forest / Focusmate

Locks your phone but trusts your word.

Habitica / Toggl

Gamifies habits but can't verify them.

ChatGPT / Notion AI

Helps plan but has zero accountability.

THE SOLUTION

Plan it. Climb it. Prove it.

A calendar-first accountability loop that makes follow-through visible.

Calendar tells you WHAT

Google Calendar is the source of truth. Real events, not user-typed goals.

Camera tells you HOW

Two AI layers verify you're showing up — Claude Vision + MediaPipe gaze.

Friends tell you WHY

Real accountability, not self-report. Designed for support, not shame.

HOW PRODUCT WORKS

The mountain isn't decoration. It's the entire interface.

Mountain as Information Architecture

Two-Layer Focus Verification

 **LLM** — Claude Haiku Vision, periodic JPEG checks, distraction 0 to 1

 **CV** — MediaPipe + OpenCV, continuous gaze at 30fps over WebSocket

Features Shipped at Hackathon

- ✓ Full Calendar to Mountain to Summit flow with timer
- ✓ Friends screen with invite links and live climbing status
- ✓ Snowball throw — throw at friends less focused than you
- ✓ Trust toggles and low-pressure mode
- Real-time eye-tracking over WebSocket (prototype)

Design Philosophy

Support, not shame. The mountain stalls — it doesn't fall off a cliff. Built for the realistic student, not the productivity maximalist.

MARKET OPPORTUNITY

A \$30B market that still hasn't solved accountability.

Why Students First

- ✓ Highest pain — 47% cite procrastination as top problem
- ✓ Existing calendar habits — zero habit formation needed
- ✓ Dense social graphs — study groups, cohorts, roommates
- ✓ University distribution — wellness programs, tutoring

Expansion Path

- Phase 1** US college students to APAC and EU universities
- Phase 2** Young professionals, remote workers, freelancers
- Phase 3** Workplace edition — "Calculus 2" becomes "Q4 OKRs"

COMPETITOR ANALYSIS

We combined three real-time systems
no productivity app has.

Product	Calendar-Native	AI Verification	Social / Friends	Real-Time Visual	Trust Controls
CompCal	✓	✓	✓	✓	✓
Forest	—	—	~	—	—
Focusmate	—	—	~	—	—

Our Moat

Calendar + AI verification + social broadcast is a compound no competitor offers.

Positioning

The first verified commitment platform built around your existing calendar.

Network Effects

Each friend makes the mountain more compelling. Social graph is the moat.

TECH STRUCTURE

Built on Vercel — serverless, scalable, zero-ops.

The mountain spreads itself. Friends invite friends.

Phase 1: Campus Viral (Months 1-6)

- Launch at NYU, Columbia, Stanford with hackathon buzz
- Friend invite links with mountain preview of climb history
- Study group seeding: 1 user activates a cohort of 4-6
- TikTok / IG: "watch me climb while studying" format

Phase 2: Institutional (Months 6-18)

- Pilot with 5 university counseling offices
- Embed in peer tutoring and study hall programs
- Student government subsidized access

Revenue Model

Freemium

Free

Basic mountain, 2 friends, 5 sessions/week

CompCal Pro

\$5/mo

Unlimited sessions, full friend graph, stats, animal unlocks

Campus License

\$2/student/yr

Bulk university license for wellness programs

Key Metrics

Invite conversion

Sessions/user/week

4+

30-day retention

60%

Friends per user

5+

PRODUCT ROADMAP

From hackathon to 10M climbers.

NOW

Foundation

- ✓ Calendar to summit loop
- ✓ Claude Vision focus checks
- ✓ Real-time friend leaderboard
- ✓ Snowball throw mechanic
- ✓ Google OAuth + Calendar
- ✓ Session timer, pause/resume
- ✓ MediaPipe gaze prototype

MONTH 1-2

Production

- Wire MediaPipe into main flow
- Real calendar sync pipeline
- Unified backend storage
- Mobile-responsive PWA
- Polish onboarding + invites
- Beta at NYU + Columbia

MONTH 3-6

Social Graph

- Co-study shared mountain
- Animal unlocks tied to summits
- Multi-mountain difficulty
- In-session AI study Q&A
- Weekly commitment digests
- University pilot partnerships

MONTH 6-12

Platform

- Browser extension
- Native iOS + Android
- Campus license + SSO
- Study analytics dashboard
- Animal skin marketplace
- International expansion

YEAR 2+

Expansion

- Workplace edition
- Enterprise team mountains
- LMS integrations (Canvas)
- Research partnerships
- Global leaderboards
- \$21M ARR target

FUNDRAISING & USAGE

Seeking \$500K seed to ship, grow, and verify.

Fund Allocation

12-Month Milestones

- M3 1,000 MAU across 3 campuses, PWA shipped
- M6 10,000 MAU, first 3 campus licenses
- M9 50,000 MAU, \$5K MRR, Series A metrics
- M12 100K MAU, \$30K MRR, iOS + Android beta

Why Invest Now

-  **Full loop shipped in 24 hours**
Calendar to summit with AI verification. Not a prototype — a product.
-  **We are the user**
Four overloaded students built this because we needed it.
-  **Novel compound moat**
Calendar + AI + social broadcast. No competitor has all three.
-  **\$4.2B SAM, growing 13.2% CAGR**
Students are the first generation living in their calendar.

Expected Outcomes, 18 Months

EDUCATIONAL & SOCIAL GOOD

We built it because we are the user.

CompCal creates genuine social support for studying — not surveillance, not shame.

Academic Follow-Through

Builds reliable study habits with social support instead of isolation. Rewards consistency over perfection.

Community over Competition

Watching friends climb motivates through connection. Outcomes visible after summit, not during.

Trust by Design

Users control focus check intensity. Low-pressure mode available. Support, not judgment.

"A student who has 5 deadlines and 3 study groups and one bad night can still show up tomorrow. CompCal is for them."

- ✓ Reduces academic anxiety by externalizing commitment
- ✓ Builds community in remote and hybrid environments
- ✓ Creates data on what students actually struggle with
- ✓ Bridges the gap between planning and doing

THE TEAM

Four students who stayed up all night
because we cared.
